		Aperture Diameter	23mm

## HIGHLIGHTS

**5.0 Megapixels**

**Aperture 23mm**

**Professional Measurement Tools**

**USB 2.0 Interface**

## PRODUCT SUMMARY

The AM7023 DinoEye digital eyepiece can help users upgrade their existing microscope, by replacing the eyepiece of a traditional microscope eyepiece with the DinoEye digital eyepiece.

The AM7023 digital eyepiece uses an USB 2.0 interface that fits eyepiece slots with an inner diameter of 23mm.

You can use the AM7023 digital eyepiece as a teaching tool, for digital imaging documentation, or simply for comfort on those long hours viewing into a microscope.

Included with each DinoEye digital eyepiece is a copy of the "DinoCapture" software, enabling you to "capture" either a photograph, video, or time-lapsed video within a few simple clicks.
