		Aperture Diameter	30mm / 30.5mm

**HIGHLIGHTS****5.0 Megapixels****Aperture 30mm****Professional Measurement Tools****USB 2.0 Interface****PRODUCT SUMMARY**

Dino-Eye Premier AM7023B digital eyepiece is an USB 2.0 powered device that has five megapixels of resolution that allows large detailed images under the microscope with picture sizes up to 2592x1944. The eyepiece fits traditional microscopes with 30mm diameter eyepiece slots and 30.5mm diameter eyepiece slots with its included adapters. Simply remove the optical eyepiece and insert the Dino-Eye to digitalize your microscopy experience.

The Dino-Eye can be found useful for using in either a production line or a laboratory for inspection and documentation. In addition to the merit of digitization, the user can find the experience of using a microscope to be more pleasant and comfortable especially for daily microscope users.
