

AM4115ZTL Dino-Lite Edge

Has better adaptability to different applications with the detachable and exchangeable front cap design. Long working distance, polarizer with wider range of magnification.

SPECIFICATIONS

Product Number	AM4115ZTL	Magnification	10x~140x
Warranty Period	1	Pixels	1.3 Megapixels (SXGA)
Condition	New	Microtouch	Yes
Packaging	Retail Box	Data Output	USB 2.0
Sensor	Color CMOS	Frame Rate	Up to 30 frame-per-second
Lighting	8 white LED lights	Operating System	Windows 8, 7, Vista, XP
Polarizer	Yes	Supported	MAC OS 10.4 or later
Measurement Function	Yes	Unit Weight	100 (g)
Calibration Function	Yes	Unit Dimension	10.5cm (H) x 3.2cm (D)

PRODUCT SUMMARY

The Dino-Lite® AM4115ZTL Edge series handheld microscope features improved optics for sharper images, an adjustable polarizing filter, and a long working distance. With its polarizer feature, this model is especially well suited for applications involving highly reflective or translucent materials, such as electronics repair, LCD quality inspection, or jewelry fabrication.

The AM4115ZTL includes our standard MicroTouch shutter button for quick and convenient picture taking, while the built-in bright white LEDs fully illuminate the viewing subject. The specialized software bundled with this product allows users to calibrate the microscope, capture & annotate images, measure image features, and record video.
